

AX550i CIJ PRINTER

Ax550i CIJ Printer

Suitable For The Harshest Environment

Suitable for even your toughest environment the robust and stackable **Ax550i** cabinet is marine-grade stainless steel with IP66 environmental protection. An IP66 rating makes this cabinet dust-tight and even able to withstand powerful water-blasting during heavy-duty, production line cleaning.

Clean And Clear Codes

High resolution print messages and multiple line codes are available at your fastest print speeds allowing large amounts of data for high-speed, rapid throughput printing. Higher quality codes are optimised for Machine Readable Codes (MRC) and Optical Character Recognition (OCR) systems helping to reduce rejects.

Smooth Integration

For smooth integration into your production line the Ax-Series supports leading industrial communication protocols simplifying installation and automation on-line. Ax-Series printers can be integrated into networked printer systems providing centralised code templates for error-free coding and integration into your existing business systems such as Enterprise Resource Planning (ERP).

SafeGuard Service Plan

Fix your spares and service costs for up to seven years with our SafeGuard packages. Remote diagnostics often gets you up and running immediately or ensures a Domino engineer arrives prepared and with the right genuine spares. Additional options include training, optimisation visits, priority response, remote monitoring and 24/7 helpdesk.

Tech Corner

As a member of EuPIA Domino can supply inks which are manufactured in accordance with current EuPIA Good Manufacturing Practices. Domino inks also take into consideration Inventory Lists like the Swiss List, and we offer a number of solvent bases that are drug precursor free.
